# Let us entertain you

Specifically designed for wall-mounting alongside today's flatscreen TVs, the Jamo A 804 is a tall, three-way speaker, intended for use as a main front left/right channel or centre-channel speaker.

The midrange/tweeter unit is an entirely new Jamo developed co-axial unit featuring WaveGuide technology. The clever 3-way construction of the A 804 produces a perfect sound dispersion pattern, giving you maximum freedom when positioning your flatscreen, surround system and sofa. Delivering a good, clean bass response is such a wall-mounted design is a challenge but Jamo has employed a flow-optimised port to do just that.

The bulk of the A 804's cabinet is formed from steel wrapped in a high density polymer while the ends are formed of high-gloss, lacquered aluminium. Black leatherette hugs the sides of the speaker giving it a luxurious presence.

The A 804 delivers a surprisingly effective bass in its own right but adding a sub really beefs things up. Consider adding a SUB 300 or SUB 250 and you will feel the earth shake.

If you wish a discrete surround solution you may consider using one of our unique in-ceiling surround speakers for the rear channel or alternatively A 500 or Graphic.

| **Specifications** | **A 804** |
|---|---|
| System | 3-way bassreflex |
| Woofer (mm / in) | 114 / 4½ |
| Midrange (mm / in) | 114 / 4½ |
| Tweeter (mm / in) | 19 / ¾ |
| Power (W long / short term) | 80 / 120 |
| Rated output (W) | - |
| Frequency Range (Hz) | 70 - 20,000 |
| Impedance (Ohm) | 6 |
| Weight (kg / lb) | 5.9 / 13.0 |
| Dimensions HxWxD (mm / in) | 700 x 160 x 100 / 27.6 x 6.3 x 3.9 |
